Continuation Sheet (PTO-303)

Application No. 09/051,547

Continuation of 2. NOTE: After a through phone discussion about the Lane and Keith references, the amendment dated 6/5/02 appears to overcome the combination of Lane and Keith. The newly proposed limitation "wherein said priority identifier is used by the picture decoding apparatus to determine whether each picture should be processed or not be processed according to a processing load or a processing capacity of the picture decoding apparatus, and said priority identifier is used independently of the picture identifier and independently of whether the picture is an I, P or B picture" requires further search and meticulous consideration in order to determine the patentability of the present invention.
